

TurfMutt's Family Yard Fall To-Dos

TurfMutt knows that in many areas, fall is a dog-gone good time to spend in your family yard. It's also the top-dog time of year to prep our living landscapes for another favorite season – spring. Here's what you need to do now to have a fabulous and TurfMutt-approved family yard.

Remove Leaves

Mulching your leaves – rather than raking and bagging – is good for your lawn and the environment. As shredded leaves decompose, they feed your lawn, naturally.

Aerate the Family Lawn

Aerating prevents soil from becoming compacted and covered with thatch – a thick layer of roots, stems, and debris that blocks water, oxygen, and nutrients from reaching the soil.

Mow at the Right Height

Keep cutting your grass until the first hard frost. Find the just-right length for your species, typically between 2–3 inches, to keep your grass healthy when it turns cold.

Water Wisely

If you're not getting at least an inch of water a week from Mother Nature, you'll want to keep watering through the fall. Install watering solutions, such as smart controllers on irrigation systems, to help conserve water.
